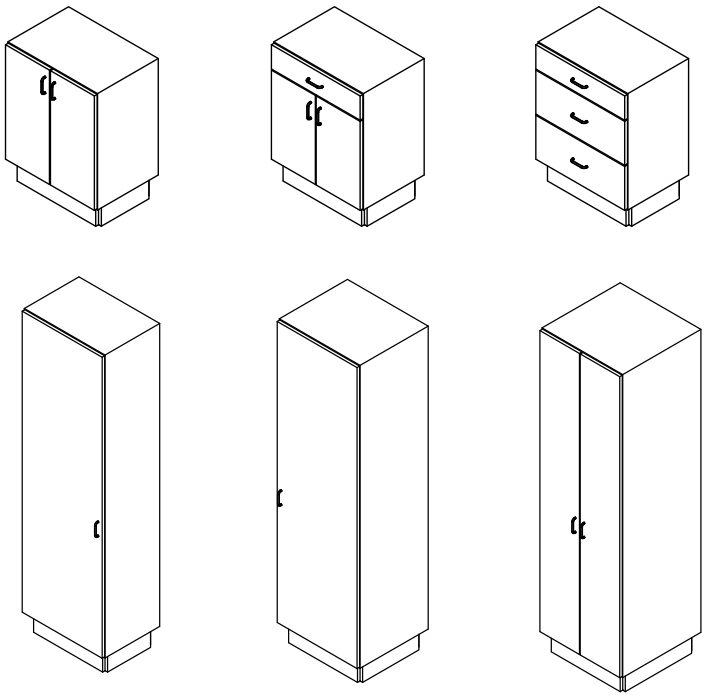
SELECTION GUIDE

FORM®
COLLECTION

CASEWORK OPTIONS



FORM® is a collection of standard prefabricated headwalls and casework that can be configured and combined to create your ideal healthcare space.

The *Casework Selection Guide* serves as a design resource to assist in understanding the various pre-designed casework modules available to complement and enhance headwalls in the Form® Collection. Featuring both cabinet and wardrobe module options, Form® Collection Casework can be integrated directly into the headwall design to provide ample storage at the bedside. This flexible mix-and-match approach gives you the ability to create a visually stunning space while effectively addressing the specific practical needs of your project.

Whether you're specifying for a new project or looking to update an existing space, the selections guide will provide you with the casework details you need.

Contact a Modular Sales Representative to start **FORM**ing your space today.
