BED DOCKER

Models BD 600, BD602, and BD604

The Modular Services Bed Docker is a UL Listed assembly that provides a “docking” location for the patient bed with electrical devices on each side. These devices will be as shown on the project drawings.

Services are segregated into compartments and all pre-installed devices are pre-wired to service termination locations, ready for connection to the incoming services being fed from the building wall behind.

The Bed Docker module incorporates 16-gauge steel housing for installation of the electrical devices. This housing is trimmed with a single piece, high-impact Kydex® cover. The standard color of the Kydex® cover is either “Surf” or "Platinum Grey.

Available options are: Standard Bed Docker (BD600), Bariatric Bed Docker (BD602), and Deep Bed Docker (BD604).
